GENERAL PRODUCT INFORMATION:
This fixture is intended to be installed utilizing NEC compliant junction boxes.
This product is suitable for damp locations.
This product can be dimmed with a low-voltage electronic dimmer.

Prepare the Fixture

1A
Remove the shade by sliding it all the way over to release it from the keyhole slot, then carefully pull it straight out.

1B
Unscrew the two thumb screws to separate the mounting plate from the backplate.

Back Plate Installation (Horizontal)

2A
Connect the white fixture wire to the neutral power line wire with a wire nut.
Connect the black fixture wire to the hot power line wire with a wire nut.
Connect the fixture to a suitable ground in accordance with local electrical codes.

CAUTION - RISK OF FIRE
This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved. Use minimum 90°C supply conductors.
Properly place all wires and wire nut connections into the electrical box.

Secure the mounting plate to the electrical box by completely screwing in the thumb screws.

Align the large openings in the keyhole slots on the shade to the screws on the back plate and install the shade onto the backplate.

Lock the shade in place by sliding it over.

**Back Plate Installation (Horizontal)**

(horizontal plaster ring or octagonal electrical box)

1. Align the two screw holes in the middle ring of the mounting plate vertically and secure it to the electrical box with the two #8-32 screws provided.

2. Connect the white fixture wire to the neutral power line wire with a wire nut.

3. Connect the black fixture wire to the hot power line wire with a wire nut.

4. Connect the fixture to a suitable ground in accordance local electrical codes.

5. Properly place all wires and wire nut connections into the electrical box.

6. Secure the back plate to the mounting plate by completely screwing in the thumb screws.

7. Align the large openings in the keyhole slots on the shade to the screws on the back plate and install the shade onto the backplate.

8. Lock the shade in place by sliding it over.
Back Plate Installation (Vertical)

**NOTE:** If plaster ring holes are vertical or mounting onto a octagon electrical box, skip to section 5.

---

**4A**

1. Connect the white fixture wire to the neutral power line wire with a wire nut.
2. Connect the black fixture wire to the hot power line wire with a wire nut.
3. Connect the fixture to a suitable ground in accordance with local electrical codes.

---

**4B**

4. Properly place all wires and wire nut connections into the electrical box.
5. Secure the mounting plate to the electrical box by completely screwing in the thumb screws.

---

**4C**

6. Align the large openings in the keyhole slots on the shade to the screws on the back plate and install the shade onto the backplate.
7. Lock the shade in place by sliding it over.

---

**5A**

1. Align the two screw holes in the middle ring of the mounting plate horizontally and secure it to the electrical box with the two #8-32 screws provided.
2. Connect the white fixture wire to the neutral power line wire with a wire nut.

3. Connect the black fixture wire to the hot power line wire with a wire nut.

4. Connect the fixture to a suitable ground in accordance with local electrical codes.

5. Properly place all wires and wire nut connections into the electrical box.

6. Secure the mounting plate to the electrical box by completely screwing in the thumb screws.

7. Align the large openings in the keyhole slots on the shade to the screws on the back plate and install the shade onto the backplate.

8. Lock the shade in place by sliding it over.

NOTE: Ensure that the shade will slide down to lock in place.
